BRING YOUR SMALL BUSINESS TECHICAL CHALLENGES TO DEVELOPING MAIN STREET. It's an event to bring together two communities who need each other. The small business owners and the experts in the technology your business uses every day.

Get the answers you need to important technology questions:

- How do I set up my online store?
- What is the best email marketing service?
- Should I sign up for Google business services?
- What kind of Social Media should I be using?
- What is the best service or platform to build my website?

These can be daunting questions when you have to run a business full time. Our event will help business owners pinpoint their tech challenges and then match them with experts who can help direct them towards better solutions and empower them to grow.

EVENT COST

\$25
